

BE PART OF A TEACHER COMMUNITY

as part of a European Project, Artificial Intelligence for and by teachers (AI4T)

www.ai4t.eu

[@ai4t_project](https://twitter.com/ai4t_project)

Co-funded by the Erasmus+ Programme of the European Union 

Are you a teacher, curious by nature and fascinated by ICT in education? Are you puzzled but not afraid of AI and want to know how AI affects learning in the classroom and at home? Would you like to find out how you can use AI to motivate your students even more and encourage them to learn?

HERE IS WHAT WE NEED AND OFFER:

WHO:

Math and language **TEACHERS** in Post-Primary Schools (pupils aged 15-17). Participants will be randomly divided into a test- and a control group.

WHY:

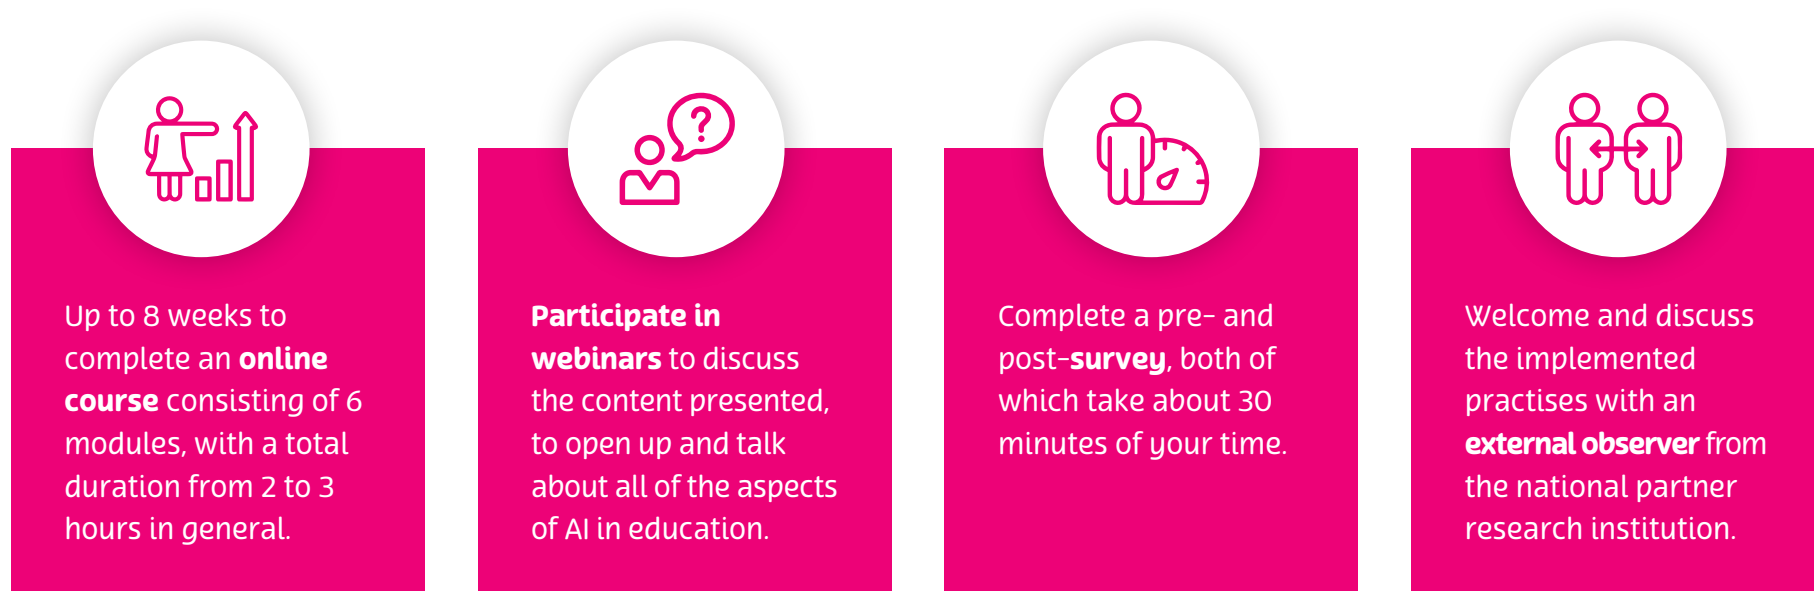

Join a **TEACHER COMMUNITY**, which will explore, test and provide feedback on a range of learning resources on AI.

WHAT:

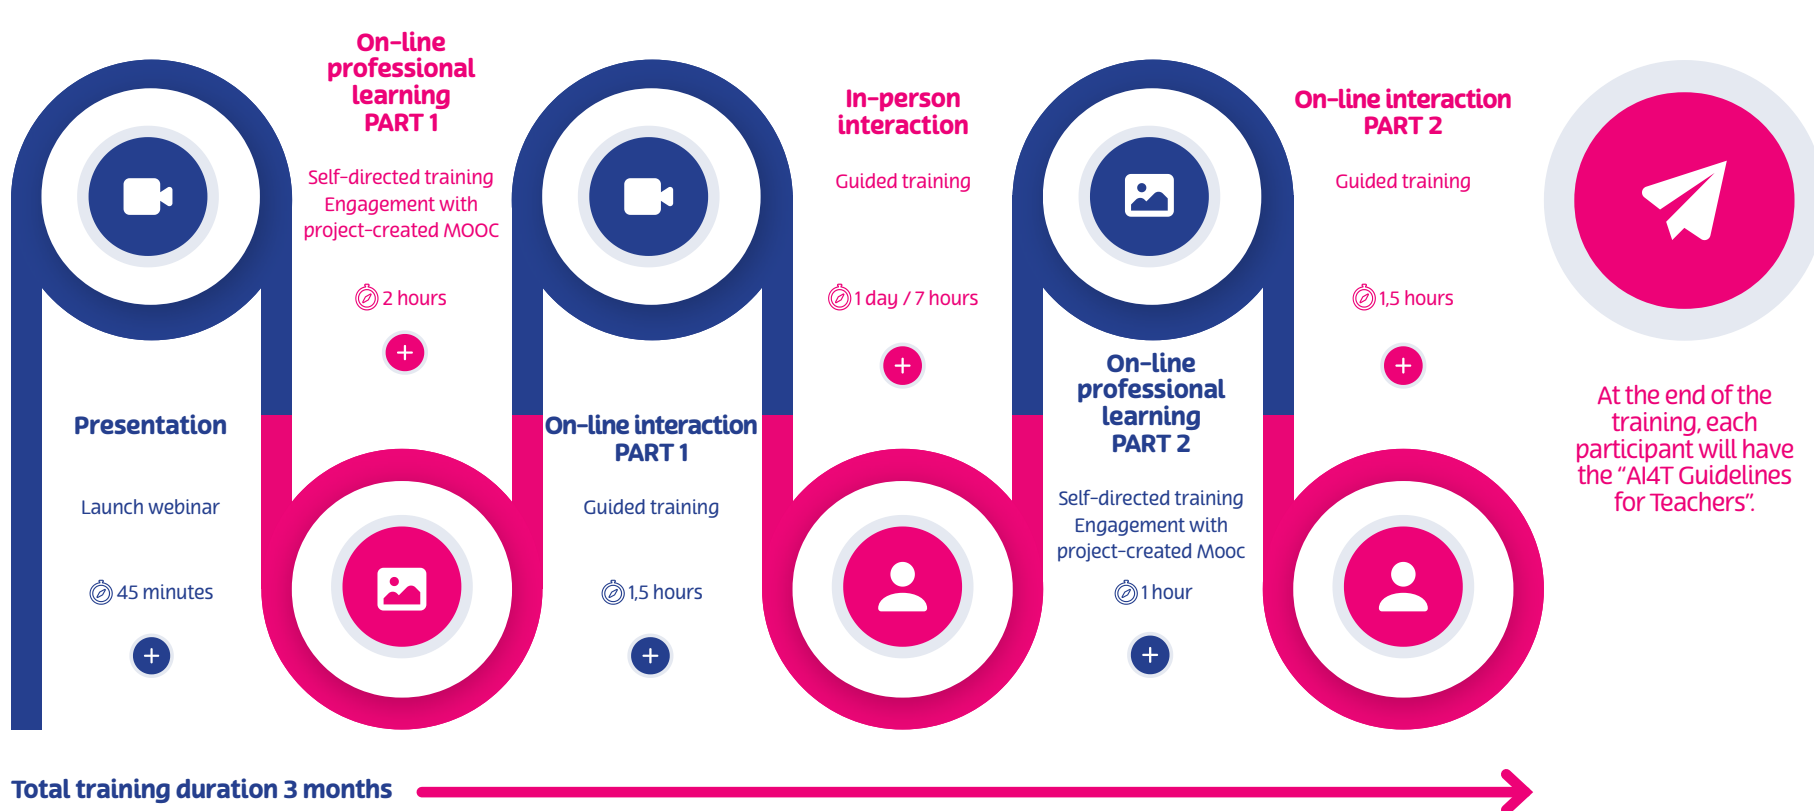

Participants will have the opportunity to learn about AI in relation to their daily teaching practise. To do this, they will participate in an **online course**, have access to **interactive online material**, share their views and questions in **webinars** and **provide feedback** on resources to prepare recommendations at European level. Members of the test and control groups will all have access to the training and materials, but at a different time.

“AI has the potential to transform the way we teach and learn. The AI4T course will answer a number of questions teachers have about AI.”

WHAT IS YOUR INVESTMENT? IN THE PERIOD FROM NOVEMBER 2022 TO MARCH 2023

How will the training and project process flow?

WHAT DOES EVALUATION INVOLVE:

A first questionnaire on knowledge, perceptions and use of AI will be sent to teachers of the **test group** in October 2022.

Once the first half of teachers have completed the course, all teachers will be asked to answer a second questionnaire addressing the dimensions measured in the first questionnaire. For those who have completed the course, their commitment and satisfaction with it will also be assessed.

At the same time period, school leaders will answer a questionnaire regarding the support given to teachers to participate in the AI4T training and to integrate AI in the school.

Interviews will then be conducted with a limited number of teachers to better understand their experience with AI and the professional learning resources provided and to elaborate recommendations for the development of AI in education. Some interviews will also be conducted with school leaders.

HOW MUCH TIME WILL IT TAKE?

Teachers

2 x 20-30 minutes per questionnaire

Only for a limited number of teachers: 1 hour (interview)

School leaders

15-20 minutes per questionnaire

Only for a limited number of school leaders: 1 hour (interview)

The evaluation is conducted by an independent evaluator in each country.

BENEFITS FOR TEACHERS:

1. You become part of an educational community and strengthen your network and social capital!
2. Develop and share best practices for professional development.
3. You participate in something bigger, international that will contribute to the development and perception of the use of AI in education.
4. Get access to professional development training.
